Summary

Full Stack Developer with 4+ years of experience building scalable distributed systems using **Java, Spring Boot, GraphQL, Microservices, Redis, PostgreSQL, AWS & GCP**. Strong focus on API design, performance optimization, cloud-native architecture, caching, CI/CD (Continuous Integration & Deployment) and DevOps workflows. Experienced in modernizing legacy systems and delivering reliable features in Agile environments. Open to opportunities in **Netherlands, Germany & Ireland,** with willingness to relocate across Europe.

Skills

Backend & APIs — Java, Spring Boot, Spring Microservices, Hibernate, JPA, REST APIs, SOAP APIs, GraphQL (Apollo, Federation), Nodejs

DevOps & Cloud — AWS, SQS, GCP, Kubernetes, Docker, Helm, GitHub Actions, Jenkins, OpenSearch, CloudWatch, AppDynamics, Dynatrace

Databases & Caching: — MySQL, (NoSQL) MongoDB, PostgreSQL, Google FireStore, Redis Cache

Frontend — React.js, Angular, JavaScript, TypeScript

Developer Tools — Git, SOAPUI, Postman, Swagger, JMeter, Open-Telemetry, Sonar, Veracode, Zookeeper, JUnit, Jest, Lint, Maven, Python (Scripting)

Experience

Information & eGovernment Authority (iGA) — Manama, Bahrain

Full Stack Developer (Consultant - Contract role, Onsite) — 05/2025 - Present

Built E2E services across 5 applications using diverse tech stack: GraphQL, Java, Spring Boot, Java Script, Angular, PostgreSQL, AWS and **Camunda.**

- Contributed to the development of **Building Permits (Benayat)** Application, enabling users to create, update, track and manage permit requests.
- Designed and implemented **GraphQL APIs**, including schema design, complex resolver logic, automated tests using **Jest**, optimized PostgreSQL queries, improving response times by **25%**.
- Worked on **Angular UI** application, to support new backend services, ensuring seamless integration and improved user experience.
- Maintained and enhanced a **legacy Java application**, resolving defects and delivering new features with high reliability while preserving existing functionality.
- Leveraged **Camunda BPM Engine** for workflow automation, approval processes and streamline application lifecycle tracking.
- Built **Schedulers and Notification Services** using **AWS Lambda** and **Amazon SES** to support automated communication workflows.
- Implemented **asynchronous processing** using **AWS SQS** to improve system performance, and reduce response latency.
- Collaborated closely with Senior Developers, participated in code reviews, followed best practices and maintain high code quality.

Infosys — Bangalore, India

Digital Specialist Engineer — 09/2021 - 04/2025

Major Telecom Company (US Client) - Backend Developer - Java with Spring

- Experience in developing Telecom and E-Commerce applications using **Java, Spring Boot, Redis Cache** and **Maven** in **Agile** with **JIRA.**
- Helped deliver new product & feature rollouts through that contributed to a **50% increase in sales**.
- Worked with **Spring Microservices** and **API Gateway (JWT, OAuth2)** for secure **Authentication** & **Authorization.**
- Implemented **Hystrix Circuit Breaker**, **Fallback** mechanisms and applied **Spring AOP** for **logging**.
- Used **REST, SOAP APIs** and tools like **Swagger, Postman**, **SOAP UI** and **JMeter** for Integration testing. **Apache Zookeeper** for application context.
- Leveraged **Kafka Message Broker** to automate retries for failed orders, ensuring reliable order processing.
- Improved coding standards with tools like **Sonar Lint**, **SonarQube** and **deployed** to **AWS EKS** via **Jenkins**.
- Actively participated in **deployment** strategies (recreate, Blue-Green, Canary); provided **immediate** critical **production code fixes**.
- Modernized legacy modules, documented workflows and supported onboarding through knowledge transfer sessions.

Major E-Commerce Company (German Client) - Full Stack Developer - MERN / GraphQL

- Developed scalable backend services using **Node.js, GraphQL, Apollo Federation** and contributed UI enhancements in **React.js**.
- Transitioned from monolithic to **Federated sub-graphs**, improving scalability and reducing maintenance overhead; boosted system **performance by 20%**, enabling stability during high-traffic sale events. Supported multiple **POC**s to **identify issues** and **enhance development processes**.
- **Designed** the **LLD** for **GraphQL Coprocessor** Application for Authorization and integrated **Apollo Router** for unified schema orchestration.
- Implemented secure communication using **Secret Manager,** schema publishing to **Apollo Studio** via **Rover**, and high-quality unit tests with **jest**.
- Used **Firestore, PubSub, Google Cloud Functions and Cloud Run** as a caching layer to improve Authorization performance.
- Contributed to **GKE deployment pipelines** using **GitHub Actions, Helm Charts,** and **Docker-based** containerization efforts. Deployed code via **Git** and **GitHub Actions** to **GCP**. Used **Python** for **scripting** and **AI tools** to **increase productivity**.
- Integrated **Open Telemetry** and **Stellate** for distributed **tracing** and **caching**; performed **load testing** using **Vegeta** and **JMeter**.

Education

Jawaharlal Nehru Technological University, Kakinada — 06/2017 - 07/2021

Bachelor of Technologies - Electronics And Communications Engineering

Achievements

Earned 6 Appreciation Badges and Won 4 Awards

- Awarded **Rookie of the Year** for exceptional performance & fast learning.
- **Award from Client** for my on-time delivery and consistent contributions to key project milestones.
- Recognized by the Architect for **optimizing Jenkins pipelines,** improving CI/CD efficiency, simplifying and **reducing deployment time by 20%**.
- **Appreciated by Senior Leadership** for improving code quality, resolving high-priority defects in existing code, streamlining code clean up activities, and delivering immediate production fixes while adhering to best coding practices.
- Earned **multiple Appreciation Badges** for contributions to process optimization, testing strategies, and ensuring smooth production releases.

Certifications

Infosys Certified Java Developer

Infosys Certified Spring Boot Developer

Salesforce Certified AI Associate

Languages

English Professional

Hindi Proficient

Telugu Native

Kannada Beginner
